Data Processing Digest

3848 FREDONIA DRIVE • LOS ANGELES, CALIFORNIA • 90068

PUBLISHED EACH MONTH SINCE 1955

VOLUME 32, 1986

1986 ANNUAL SUPPLEMENT

INDEX AND REFERENCE LIST

Title Index 1
Author Index 5
Subject Index 8
Periodical List 11

INDEX

This is the annual index for DATA PROCESSING DIGEST for the year 1986, Vol. 32, Nos. 1-12. The index is divided into three sections: the list of titles as they appeared in the Digest, a list of authors, and a subject index. All articles have at least one subject citation. Italicized titles are books, periodicals or reports. The numbers following the entries indicate issue and pages in which the item is found. The number preceding the hyphen is the issue; the numbers following the hyphen are the pages.

TITLE

Accelerated Design Speeds the Application Development Process, 9-14
Accounting For Ergonomics, 1-14
Accounting For Information Center Costs, 5-12
Accounting For Software Development Costs, 2-9
ADA: An Introduction, 2-30
Adding Another Layer, 11-1
Advanced Business BASIC For Microcomputers, 4-33
Advice For the Budget Bound, 5-13
The Amiga A1000 Personal Computer, 3-27
Annual LAN Special Report, 11-22
Appraising the Control Environment For Accounting Programs, 10-11
Are Maintenance Careers Dead Ends?, 4-10
Are You Ready For Project Management Software?, 12-11
The Art Of Managing Software Development People, 3-33
Artificial Intelligence Applied To Manufacturing, 2-26
Artificial Intelligence and Financial Services, 10-23
Artificial Intelligence: A Perspective and a Dilemma, 2-26
Artificial Intelligence Research In Japan, 2-27
Artificial Intelligence Tackles Industrial Tasks, 4-30
Artificial Intelligence: The Very Idea, 5-31
Artificial Management and the Artificial Manager, 10-24
Assembling a Micro-based HRIS: A Beginner's Guide, 2-15
Assume Nothing, 5-28
An Audit Approach To Microcomputers, 9-5
Audit Issue: Large Scale Corporate Staff Cuts May Lead To New DP Control Problems, 11-26
The Audit Of EDP Backup, 2-13
Auditing CAD Systems, 4-29
Auditing DP Service Costs and Pricing, 2-13
The Auditor, EDP, and the Federal Government, 10-11
Automatic Identification Posts Major New Gains, 2-22
Automatic Identification Takes Hold In Manufacturing, 1-24
Avoiding Software Overkill, 1-20

Barriers Prevent Tools' Acceptance, 8-7
Basic Protection For Microcomputers, 9-3
A Better Way To Select Accounting Software, 8-23
Betting On 4GLs Or Cobol, 9-15
Beyond Mindstorms: Teaching With IBM LOGO, 10-29
The Big Switch, 5-29
Black-box Technique Automates Quality Control, 3-13
Bringing Image Processing Into Focus, 10-27
Building a Better Project Manager, 8-14
Building LANs Without Cables, 8-3
Building a Team For Computer Crime Investigation, 1-2
By Taking the Initiative, MIS Can Serve Legal "Justice," 7-14

Cabling Concepts, 4-23
Can You Risk $1 Million On Gut Feelings?, 12-24
CAP Systems Keep Lid On Paper Woes, 8-28
Capacity-based Pricing Offers Viable Chargeback Alternative, 1-13
Case Histories In Computer Security: Selling Information Security at GM, 10-10
Categorizing the Database Decision, 9-22
CBT: Keystone Of an Information Center, 8-18
CD-ROM, 12-23
CD-ROM "Arrives" In the Library: Powerful Databases Marketed, 6-25
Change Control and Problem Tracking: Data Center Survival Techniques, 2-6
Choosing the Best MRP II System, 4-19
Choosing Your Telecom Carrier, 11-20
CIM and the Flexible Automated Factory Of the Future, 3-5
Classifying Maintenance Tools, 11-17
Closing the Gap: A Workstation-Mainframe Connection, 7-4
COBOL Application Code Generators, 3-14
COBOL Restructuring Engines Clean Up Spaghetti Code, 6-17

The Coming Computer Industry Shakeout: Winners, Losers, & Survivors, 3-32
Communications Security For Distributed Processing Systems, 2-11
Compaq's Portable II, Portable 286 & DeskPro 286 Personal Computers, 6-15
Compressing Distribution Into a Network, 6-20
Computer Based Information Systems, 2-29
Computer Bulletin Boards and the Hacker Problem, 1-1
Computer Integrated Manufacturing—People and Technology, 2-1
Computer Maintenance Goes On-Line, 12-7
Computer Program Changes Controls, 7-24
Computer Security In an Insurance Environment, 6-13
Computer Technology: The Next Revolution, 10-28
Computers and Accounting, 11-24
Computers Come To the Rescue, 2-4
Computers and Communication: A Vision of C & C, 10-3
Computers—Fall 1985 Survey Update, 4-23
Computers and Human Intelligence, 11-28
Computers—Spring 1986 Survey Update, 10-21
Computers—Summer 1985 Survey Update, 1-21
Computers—Winter 1986 Survey Update, 6-17
Computing In Higher Education: The Athena Experience, 2-24
Computing To Consensus, 12-17
Confidentiality Agreements, 8-29
Considering Computer Resource Consumption In the Selection Of Appropriate Development, 3-10
Contracting For the Developing Of Customized Software, 2-7
Controlling Database Costs Through Statistics, 6-9
Coping With Network Security, 3-17
Copyright Infringement: Who Takes the Rap?, 10-1
Cost Accounting In the Factory Of the Future, 7-2
The Crisscross Cities Of the Software Maintenance World, 3-18
Critical Issues In Integrating Factory Automation Systems, 4-17

Data Administration: An Old Function Adapts To Its New Role, 12-4
Data Communications Security—Exposures and Control, 4-25
Data & Knowledge Engineering, 1-26
Data Bases: An Accountant's Choice, 2-17
Data Classification For Security and Control, 3-15
Data Classification: Getting Started, 9-4
Data PBXs: Making the Switch To Network Efficiency, 12-26
Data Processing Project Management (Second Edition), 11-30
Data Processor's Survival Guide To Accounting, 4-34
Data Storage: Reeling With the Possibilities, 10-6
DBMS Basics, 8-16
Dealers Pawn Off Inferior Drives In Brand Name PCs, 5-30
Dealing With Software Standards, 10-8
Designing a Standard, 10-19
Developing High Quality Systems Faster, 9-13
Developing Standards For Protecting Electronic Financial Data, 12-30
Develoments In the Law Of Computer Software Copyright Infringement, 9-25
Developments and Software Requirements Of the Emerging National Supercomputer Research Centers, 2-25
Diamond: A Multimedia Message System Built On a Distributed Architecture, 3-2
Distributed Data Processing, 3-23
Distributed Networks: The PC As a Terminal, 7-21
Do You Have To Be a Whiz Kid To Audit Data Security?, 7-23
Documentation Software: Blueprinting Systems For Better Productivity, 2-21
Does Your DBMS Run By the Rules?, 1-5
Don't Gamble When Choosing a System Development Methodology, 9-14
Do's and Don'ts Of Desktop Publishing, 9-23
DP Auditors Should Exercise Caution In Encouraging Use Of New DP Disaster Recovery Service, 1-3
DP Law Today, 2-9

The E-Mail Shuffle, 8-4
EDP Controls In an Integrated Application Development Environment, 3-13
EDP Risk Analysis—Pinpointing Areas Of High Exposure For Effective Safeguard, 7-22
The Effect Of User-Developed DSS Applications On Forecasting Decision-Making Performance In an Experimental Setting, 1-26
Electromagnetic Radiation Revised, 9-2
The Electronic Connection, 11-22
Electronic Data Interchange, 12-27
Electronic Data Interchange—Taming the Paper Tiger, 4-21
Electronic Document Management: The Coming Revolution In Records Management, 1-16
Electronic Mail: An Ever-Changing Technology, 2-15
Electronic Mail—Future Directions, 8-5
Electronic Seal For Protection Of Electronic Money In Sweden, Finland and Norway, 4-27
The Electronic Tax Return: Is Paperless Filing Here?, 5-23
The Emergence Of "Smart Buildings," 1-15
Emergency Preparedness: Your Institution Needs a Plan, 6-12
Employee Confidentiality Agreements, 8-29
An Encryptor That Stops "Data Diddling," 9-4
Encyclopedia Of Information Systems and Services Directory, 4-33
End-User Computing: Are You a Leader Or a Laggard?, 10-9
End User Demand Requires New Approach To Training, 7-26
Engineering Support System User Requirements, 2-5
Enough Already, 6-21
Epson's Line Of Equity Personal Computers, 6-15
The Ergonomics Of Office Keyboards, 7-29
Excellence In Manufacturing Appliances, 9-25
Executive Information Systems: An Overview Of Development, 12-18
The Executive Use Of Workstations, 6-20
Expert System Shells: Design Tools Help MIS Answer Management's Call, 9-17
"Expert Systems" Are Expected To Reshape the Fundamental Nature Of DP Auditing, 2-12
Expert Systems Blaze Trails To AI Success, 7-29
Expert Systems: Can They Help Prevent Disasters?, 4-30
Expert Systems: How To Get Started, 12-8
Expert Systems: The Next Challenge For Managers, 10-23
Exploring IBM Logo: A Guide For Adults, 3-32

Factors In the Evaluation and Selection Of Software, 7-14
Facts About Protecting Electronic Equipment Against Fire, 1-3
Feature Technology: A Key To Manufacturing Integration, 7-3
The Final Frontier, 2-20
Finally. . . Software For Managing Imports, 10-22
Finding the Technical Users, 11-3
Five Questions To Ask About Clone Compatibility, 12-25
For Better Quality—Get Control Of Data, 8-22
Formation and Workings Of a Corporate-Wide CIM Committee At Garrett Corporation, 1-25
4GLs Without Philosophy, 8-12
Fourth-Generation Application Development, 8-11
Friendly Mainframe Software Guides Users Toward Productivity, 4-13
Full Text Databases: When To Use Them and When Not To Use Them, 10-21
Function Points: The New Measure Of Software, 1-7

Gaining Control Of Maintenance, 5-20
Gateways Grow Up, 1-23
The Generic System Design Approach, 11-3
Getting Around In Departmental Computing, 7-15
Getting the Database Right, 12-20
Getting Into VSAM: An Introduction and Technical Reference, 8-31
The Goal, 3-33
Goal Setting In the Maintenance Department, 4-9
Going For the Record, 12-12
Grow Your Own Programmers, 9-8
The Growth Of a Single Standard, 10-19
Guaranteeing Management's Future Through Succession Planning, 10-7
GUIDON-WATCH: A Graphic Interface For Viewing a Knowledge-Based System, 3-28

Half Empty Or Half Full?, 5-5
Hard Disk Drives: How Many Megabytes Are Enough?, 1-21
The Hidden Messages In Computer Networks, 4-20
High Noon Part II: The Quest For a True Test Of Software Maintenance Tools, 11-18
High User Overhead Mars Interface Design, 7-12
Holding Out For Systems Integration, 11-5

How Artificial Intelligence Can Enhance Software Engineering, 9-16
How Do You Really "Audit" the DP Disaster Recovery Plan?, 6-11
How Not To Lie With Statistics: The Correct Way To Summarize Benchmark Results, 5-16
How Not To Measure Programming Quality, 3-19
How Should We Organize the Maintenance Group?, 8-8
How To Convert To Computerized Accounting, 2-16
How To Cope With the PC Backup Dilemma, 8-20
How To Manage User Demand, 10-9
How To Select the Right Business Graphics System, 12-24

IBM Takes Aim At the Office Systems Market, 12-25
IBM's Token-Ring: What Are the Alternatives?, 11-21
Image Processing Offers MIS a New View Of Information, 9-9
The Impact Of Informatics On Vocational and Continuing Education, 6-25
The Importance Of Wiring To the Electronic Office, 2-14
Improving Data Collection Through Optical Scanning Systems, 5-2
Improving Productivity At Northern Trust, 7-9
In-house User Groups, 8-19
In the Lap-Top Of Luxury, 1-23
In Pursuit Of CIM, 4-16
Information Asset Management, 4-6
Information Center: Doomed Without Courseware, 2-7
The Information Center Institute Checklist For Project Management, 12-11
The Information Center Institute Checklist For Software Purchases, 8-20
The Information Processing "Pain Index," 12-2
Insuring Computer Risks, 12-4
Insuring Your Computer's Lifespan, 11-9
Integrating PC Users and MIS, 7-17
Integrating Security Activities Into the Software Development Life Cycle and the Software Quality Assurance Process, 12-19
Integration At Work, 3-6
The Intel 80386—Architecture and Implementation, 3-26
An Intelligent Braille Display Device, 9-24
Internal Audit and EDP Audit Staff Integration—What Are the Benefits and the Pitfalls?, 4-29
Introduction To Computer Programming With BASIC and the Apple, 4-33
Is There Life After VisiCalc?, 1-20
Is Your DBMS Really Relational?, 1-3
ISDN: Network Of the Future?, 3-21
It's Time To Break Out Of the Dark Ages, 10-13
It's True! PC-Based LANs Are For Real, 7-17

REFERENCES

The staff of Data Processing Digest regularly monitors an average of 150 computer, trade, educational, scientific, and business management periodicals for appropriate articles to digest each month. The list of periodicals varies widely from year to year, and even from month to month, as new periodicals appear, and others cease publication or change their editorial direction. Every June issue and the year-end annual supplement include all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. All addresses which do not include a country are in the U.S.

Please request copies of originals from the publisher of the periodical. Do not write to *Data Processing Digest*, as we do not copy or reprint, and your request will be delayed. Books should be ordered from their publishers or from a local technical book store.
